

Swikruti

Consent & DPDP Compliance Infrastructure

Manage consent, governance, audits, and user privacy from one unified platform

DPDP Ready

Audit Ready

Enterprise Scale

Built for Modern Privacy Operations

Consent Templates

Create and manage **reusable consent frameworks** with **customizable workflows** and approval chains.

Application Governance

Manage consent across connected applications with **centralized control and visibility**.

Audit Visibility

Track compliance activity in **real time** with complete audit trails and **automated reporting**.

User Consent Control

Allow users to review, update, and withdraw consent with **transparent privacy management**.

How Swikruti Works

1

Collect Consent

Capture explicit user consent across channels.

2

Store & Govern

Securely store consent with governance rules.

3

Track Preferences

Maintain user choices & preferences.

4

Manage Withdrawals

Enable easy consent withdrawal & updates.

5

Generate Audit Logs

Create audit trails and compliance reports.

Everything Needed for Consent Governance

The screenshot displays the 'MANAGEMENT CONSOLE' for 'SWIKRUTI USER CONSENT'. It features a search bar and a table of consents with columns for Consent ID, Consent Name, Service Name, and Created At. The table lists several consents, including 'Marketing and promotional commun...', 'Data analytics and improvement', 'Provide location-based services', 'Location services', and 'Identity verification for onboarding'. Each consent has a status indicator (e.g., 'Accepted', 'Rejected') and a 'Withdraw' button.

Surrounding the screenshot are ten feature callouts in orange rounded rectangles:

- Consent Lifecycle Tracking
- Policy Management
- Audit Logs
- Enterprise Scalability
- Role-Based Access
- Withdrawal Workflows
- Application Mapping
- Compliance Monitoring
- User Transparency
- Real-Time Dashboards
